

## AHS Engagement in the Major

Honors students in the Department of Allied Health Sciences will demonstrate excellence in health-related co-curricular activities throughout their program. Participatory activities may include: *job shadows, internships, mentoring or leadership positions, community service work, participation in a professional organization or conference*, and other opportunities related to a career in health.

To fully satisfy the Engagement in the Major requirement, Allied Health Science honors students will meet two criteria:

- First, students must submit a *journal of their health-related co-curricular activities* any time, but no later than the first four weeks of their final term. The journal will include a brief reflection for each activity. A minimum of 20 hours must be documented.
- Second, seniors will *present their research in an AHS Honors Event*. Honors students of all levels are expected to participate. This event may be used to fulfill the Engagement in the Major portion of the Preliminary Plan of Study submitted in early November of the Junior year.
